Affected QGIS version: master	Regression?: No
Operating System: openSUSE Linux	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16316
Description	
<p>Hi all,</p> <p>I am trying to prepare QGIS binaries for the release of openSUSE 12.3 (in 2 days) and I am getting some Postgres 9.2 related build error. Build log is here: https://build.opensuse.org/package/rawlog?arch=x86_64&#38;package=qgis&#38;project=Application%3AGeo&#38;repository=openSUSE_Factory</p> <p>The error says: [714s] make²: *** No rule to make target `/usr/lib/postgresql92/lib64/libpq.so', needed by `output/bin/qgis_mapserv.fcgi'.</p> <p>I tried without multithreading make and got the same: https://build.opensuse.org/package/rawlog?arch=x86_64&#38;package=qgis&#38;project=home%3Atzotsos%3AApplication%3AGeo&#38;repository=openSUSE_Factory</p> <p>Any ideas?</p> <p>Thanks, Angelos</p>	

History

#1 - 2013-04-03 04:51 AM - Jürgen Fischer

What's /usr/lib/postgresql92/lib64/libpq.so? Stale symlink maybe?

#2 - 2013-04-03 05:19 AM - Angelos Tzotsos

- Status changed from Open to Closed

This issue was fixed in OBS using a non default CMake parameter for postgres location.
