<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 16326
<b>Description</b>	
<p>Please give us the ability to duplicate a layer. It should go in both the <b>Layer</b> menu and the right-click context menu when you right-click on a layer.</p> <p>I have a situation now where I need to create a few instances of an existing PostGIS layer. I need each instance to have a different query. Currently, I have to manually build each new layer. That is cumbersome.</p>
