Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	16334

Description

Just noticed fTools's Delaunay triangulation broken; when trying to process a points layer, it freezes at 0% and eventually crash QGIS. Possibly another new vector API?

Tried on both windows and linux, both freeze 'n crash.

Commit https://issues.qgis.org/projects/quantum-gis/repository/revisions/9afe76d4d63e57abfbf8b42d2333fde548d78de3 didn't fix this issue.

- On a set of +13,000 points, QGIS chokes and eventually crashes at 0%
- On a reduced set of 655 points, the process freezes at around 50% and eventually QGIS has to be killed

I'm attaching the 655 points set to this issue.

#3 - 2013-03-22 07:32 AM - Giovanni Manghi

by the way, most of the tools in the vector menu are suffering of serious issues.

#4 - 2013-04-12 08:16 PM - maning sambale

Using the attached kml.

- I get segmentation fault using ftools in the Vector > Geometry Tools > Delaunay Triangulation.
- But this works with Sextante > QGIS geoalgortithm > Vector Geometry Tools > Delaunay Triangulation.

System: Ubuntu precise latest nightly build.
