QGIS Application - Bug report #7373
joining DSV files to table attributes, stored in wrong column

2013-03-16 05:56 PM - Nikolai Go

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:				
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Linux/Ubuntu	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16345	

Description

When I merge attributes from DSV files the data is not getting stored to the correct field, instead it overwrites the second-to-the-last field in the table. It happens with both comma-separated and tab-separated data.

I'm experiencing this on 1.9 (master) on Xubuntu 12.04 and has confirmed that the same files works properly in 1.8 (Lisboa) on Lubuntu 12.04

- Priority changed from Normal to Severe/Regression

Doesn't it duplicate #7280, #7271 or #7068 ?
