### History

#### #1 - 2013-03-20 07:49 AM - John Sankey

looks the same as #7401 but his platform not mentioned

If you try the command:

```
user@host:~$ file layer.shp
```

What do you got?

Please, could you follow the issue #7401?

This issue should be marked as duplicated of #7401

Thanks in advance

Fair enough, Daniel. I use the GUI within OSX, not commands such as you mention - don't know anything about them.

- Resolution set to duplicate

- Status changed from Open to Closed
