

QGIS Application - Bug report #7383

Layer properties window too wide

2013-03-17 12:19 PM - Paolo Cavallini

Status: Closed	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 16355
Description	
The layer properties window is too wide for 1024 px screens; it can be resized, but the text does not wrap

Still true?

#2 - 2016-01-18 07:39 AM - Paolo Cavallini

Largely yes.

do we really still support resolutions like 1024px?

#4 - 2016-04-09 11:50 PM - Alexander Bruy

Hmm, just opened layer properties dialogs (both vector and raster) in Qt Designer and they are less than 1024 px wide. Vector properties is 904x588 and raster properties is 789x593. Also I can resize them.

- Status changed from Feedback to Open

The default is not really usable. When resized, as mentioned, the content does not resize, and is difficult to use.

IMHO the content can fit perfectly on a small screen (e.g. the slider can easily be shrunk and remains usable), it's just the layout that should be adjusted.

I acknowledge this is part of a larger issue: all the GUI should be adapted to small screens also.
