QGIS Application - Bug report #7387
Merge objects fails if display field is set to hidden

2013-03-18 03:43 AM - Andreas Neumann

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Digitising			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16358	

Description

If one defines a display field (for tooltip display) and sets it to hidden in the field widget setting (so that this field is invisible in the attribute form) then merging geometries fails - the merged objects disappear.

History

- *Status changed from Open to Closed*

closing this bug as there seem to be other reasons - I can't find out what eaxactly is causing this problem with disappearing geometries on feature merging.
