

QGIS Application - Feature request #7397
allow measure tool to apply to existing features

2013-03-19 04:05 PM - John Sankey

Status:	Open	
Priority:	Normal

Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 16366
Description		
<p>Currently, it seems that the measure tool only works for an existing feature if that feature is retraced on the fly. It would save a huge amount of work with complex features if it would measure the currently selected feature; even better if it could also sum the measure of all features in a layer. (If it already does this, a reply to http://gis.stackexchange.com/questions/54663/qgis-1-8-0-mac-where-is-measure-window-or-measure-area-symbol would be most appreciated.)</p>		

History

#1 - 2013-03-24 04:25 AM - John Sankey

All features in an area are calculated in layer properties field calculator, but not individual selected features.

#2 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No
