

QGIS Application - Bug report #7464

Removing 1 subgroup from legend in print composer removes 2 subgroups

2013-03-28 06:59 AM - ramon .

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16419
Description	
<p>Today I needed to remove a subgroup of items from a legend in a print composer.</p> <p>I selected the layer title from the list, clicked the minus button and the subgroup and next subgroup below are removed.</p> <p>Confirmed for win7 (87265c7, 93ade1f) and mac (0005467) installs but probably more widespread.</p> <p>http://lists.osgeo.org/pipermail/qgis-developer/2013-March/025060.html</p>
