### Description

In OS X, I have discovered that using the CMYK color picker when editing vector layer symbology leads to a crash of qgis.app. Any layer, when editing colors and using the CMYK color picker, will result in the crash when the color picker is closed. The crash log to Console.app from a bash-initiated session follows:

### #1 - 2007-08-15 09:30 PM - John Tull

The crash occurs for colors that were made with the CMYK picker and saved to the color "favorites" palette at the bottom of the picker window. I switched to another method of color selection, but still had the crash when selecting a "favorite" color that was made using CMYK codes. Converting all of my saved colors to RGB allows me to store and use favorites. Is CMYK not supported in Qt4 or Qgis?

### #2 - 2007-11-07 04:49 PM - Tom Elwertowski

- Resolution set to fixed
- Status changed from Open to Closed

This looks like Qt bug 153436 reported in 4.3.0 and fixed in 4.3.2. When I run QGIS 8.1 (built with Qt 4.3.0), I get this crash. When I run QGIS 9.0 (built with Qt 4.3.2), I don't.
