Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	16458

Description

Using the drag'n'drop form generator, when a group container is added into a tab and there's more than one tab the group is added into the wrong tab (it seems into the first one)

- Status changed from Open to Feedback

Just tested and can't reproduce:

Procedure:

=> Click '+' / Tab 'Tab1'

=> Click '+' / Tab 'Tab2'

=> Click '+' / Group 'Group1' under 'Tab1'

=> Click '+' / Group 'Group2' under 'Tab2'

Shows up as expected in the dual view window (attribute editor, form view)

Saving and loading works as well...

Please provide more info. I'll have time to have a look at this again on Monday.

#3 - 2013-04-05 12:03 AM - Luca Lanteri

You must also add some data field to reproduce the error.

Procedure:
=> Click '+' / Tab 'Tab1'
=> Click '+' / Tab 'Tab2'
=> drag a field in Tab1
=> Click '+' / Group 'Group1' under 'Tab2'

the group1 is stored under Tab1-->Field1-->group1

tested on 1.9 (ef00813)
