Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16464	

Description

The Simplify Feature tool currently only allows the set the tolerance using a slider widget. It doesn't even display the tolerance value anywhere. If a users wants to take notes about the performed processing steps, he would have no chance with such an interface. I would therefore like to suggest adding an additional line input field where one can both read and change the tolerance settings.

Associated revisions

Revision 6c2f8d1f - 2013-04-05 01:30 PM - Alexander Bruy

display and allow editing of simplify tolerance value (fix #7515)
