Crashes QGIS or corrupts data:	Copied to github as #: 10811

Description

When you use a Grass modules that needed information about fields of the table linked to the input vector, the attribute fields are not shown in the module window and you can use it.

Es: v.to.rast.attr, v.to.db, v.distance....

It worked in vers 0.8 and 0.8.1. There were not changes in the GRASS modules.

The bug is present in Linux Debian and Windows.
