Description

QGIS crashes when I load a [[PostGIS]] Layer with wrong geometry type definition in geometry_columns.

1. Define Layer in geometry_columns with geometry type POLYGON
2. create a layer with geometry type LINESTRING
3. load this layer
4. QGIS crash

Works for me with commit:aca333fe (SVN r7323). Can you try again, and if it still occurs give some more details on the problem?

It seems to be solved. I can't reproduce this error too. I think we can close this ticket.
