<b>Description</b>		
<p>It would be nice to have a Welcome page that is shown when QGIS is run for the first time. It would replace the canvas, or be shown as a tab beside the canvas.</p> <p>The idea is to use a web view to show a nice HTML page which includes stuff as:</p> <ul style="list-style-type: none"><li>- Recent projects, with the ability to open.</li><li>- A What's New section</li><li>- Latest and Top plugins</li><li>- etc</li></ul>

Hi guys,  
here on 64 bits windows, Welcom page is there but remains empty, either for news and recent projects.  
I tested the influence ou --configpath option with no success. Any idea?  
Snapshots of recent projects are saved in profile..

Tested again on 6bf5e91, welcome page does not display anymore. General options are set to Welcome page.

#3 - 2016-01-14 10:11 AM - Alexander Bruy

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Closing, as welcome page already implemented. Reopen if necessary
