

QGIS Application - Bug report #7687

Query Builder Sample Restricted on Layer With Existing Query

2013-04-23 06:01 PM - Spencer Gardner

Status:	Closed	
Priority:	Normal

Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 16603
Description If I make a definition query on a layer using the Query Builder, accept the changes, and then go back to the query builder to modify my existing query, the Sample function only shows a sample based on the existing query. For example, if I query my existing countries layer for "Continent = 'Europe'" and then decide I want to also include "Continent = 'North America'", I can't get 'North America' to show up in the field sample; it only shows 'Europe'. I assume this is because the field sample reads off of the dataset using the active query. Ideally, the sample should include all values from the original dataset.
