

QGIS Application - Feature request #769

CMake option to define man path installation

2007-09-27 11:29 AM - silfreed-silfreed-net -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Build/Install	
Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 10828
Description	
<p>Fedora's default man page installation path is <code>\$(PREFIX)/share/man</code> instead of <code>\$(PREFIX)/man</code>; I'll attach the patch I've been using the fix this.</p> <p>It would probably be better if there was a define for setting the mandir as this could then be set per-distribution.</p>	

History

#1 - 2007-11-18 09:55 AM - Martin Dobias

- Resolution set to fixed
- Status changed from Open to Closed

This is now possible starting with commit:1b4d9631 (SVN r7455) - you can use QGIS_MANUAL_SUBDIR variable in CMake to modify default setting.

#2 - 2009-08-22 12:52 AM - Anonymous

Milestone Version 0.9.1 deleted
