

QGIS Application - Bug report #7695

GetLegendGraphic does not work with FORMAT=jpeg even GetCapabilities says so

2013-04-24 08:07 AM - Marco Lechner

Status: Closed	
Priority: Normal	
Assignee: Marco Hugentobler	
Category: QGIS Server	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch applied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16609

Description

Even GetCapabilities of a QGIS mapserver WMS tells jpeg is a valid format for GetLegendGraphic requests, trying this format results in an exception telling that GetMap does not support "jpeg" format but works with the not listed "jpg". Pull request #554 adds jpg, jpeg, image/jpg and image/jpeg as valid formats to GetMap and GetLegendGraphic requests.
