

QGIS Application - Bug report #771

Plugin path should be persisted

2007-09-27 11:39 AM - silfreed-silfreed-net -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: GUI	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10830

Description

From [Red Hat bug 247551](#) (I believe this is mostly a symptom of ticket#770):

Description of problem:

On first startup, Quantum GIS is looking for plugins at the following path:

```
/usr/bin/../lib/qgis
```

This path is non-existent on my system. The plugins are actually located in the following directory:

```
/usr/lib64/qgis
```

If I change the Plugin Directory to this path in the Plugin Manager dialog box, all the installed plugins are displayed. If I click the 'OK' button and re-open the dialog box, however, I receive a warning message that there are No Plugins (see attached file: no_plugins.png) because the Plugin Manager is again looking in:

```
/usr/bin/../lib/qgis
```

for the plugins.

Version-Release number of selected component (if applicable):

```
qgis-0.8.1-10.fc6
```

How reproducible:

Always

Steps to Reproduce:

- 1.Start Quantun GIS
- 2.Select Plugins->Plugin Manager...
- 3.Change the Plugin Directory path
- 4.Click the 'OK' button
- 5.Select Plugins->Plugin Manager...

Actual Results:

The Plugin Directory changed back to the default.

Expected Results:

The new Plugin Directory should have been persisted.

Additional info:

If after changing the Plugin Directory, all of the installed plugins are selected. new menu entries appear under the Plugins top level menu. While the Plugin Directory is forgotten the next time the Plugin Manager is opened, Quantum GIS remembers which plugins have been selected. However, this information is forgotten if Quantum GIS is re-started.

History

#1 - 2007-11-20 07:35 AM - Martin Dobias

- *Resolution set to fixed*

- *Status changed from Open to Closed*

Fixed in commit:194d12ae (SVN r7622).

I've removed possibility to change the path for plugins as it shouldn't be really necessary and just confuses users.
