Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 16640
Description		
<p>Currently it is possible to disable the settings menu with the customization tool.</p> <p>It is a valid operation, but hard to undo, because it's disabling its own UI.</p> <p>This should either be hidden and only enabled, when the user clicks a "Advanced" checkbox or spitting out a warning to make the user aware of what he's doing and telling him also, how to undo this.</p>
