

QGIS Application - Bug report #7742

can't join table created with delimited text plugin

2013-04-30 08:53 AM - Regis Haubourg

Status: Closed	
Priority: Severe/Regression	
Assignee: Chris Crook	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16647
Description	
<p>Hi,</p> <p>this is a regression, i can't join a table imported with new improved delimited text core plugin.</p> <p>Table simply doesn't show up in table list in join tab.</p> <p>Régis</p>

Thanks Régis.

It turns out I've already submitted a pull request <https://github.com/qgis/Quantum-GIS/pull/569> that addresses this. Vector layers must implement subset strings in order to be available for joining. I wanted this capability for other reasons (visualisation of subsets) - joining to other tables was an accidental consequence!

I'm not sure if this is technically a regression, as I'm not sure if it was ever available as a capability (see comments in pull request).

#2 - 2013-04-30 12:57 PM - Chris Crook

- Pull Request or Patch supplied changed from No to Yes

#3 - 2013-05-08 03:51 AM - Regis Haubourg

- % Done changed from 0 to 100

- Status changed from Open to Closed

Issue seems fixed to me. I close it, we need to start some cleanup on bug reports ;-)

#4 - 2013-05-08 03:52 AM - Regis Haubourg

I forgot the most important thing: thanks !
