Just to have an update for master (2.7):  
using the "save style in database" dialog the form is correctly saved into the field ui of public.layer\_style table, but it is ignored when the layer is loaded.  
There's no other way to load the from but copy it into a text file.

#4 - 2015-10-05 12:07 AM - Luca Lanteri

- Status changed from Open to Closed

It Works on QGIS2.11-master (ed32f49) 64bit. Tested on win7.
