Category: Browser	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16679

Description

as reported by Daniel on <http://gis.stackexchange.com/questions/60297/qgis-1-9-0-browser-crash>

I installed QGIS 1.9 dev from OSGeo4W on a Win7 machine. I can open the Quantum GIS Browser but, as soon as I click on a drive letter (on the left panel) or a shapefile, I get a message that the program stopped working and will be closed. I tried running the browser from the command line but no error message is displayed. Is this happening to anyone else?

[Fix #7784] Browser keeps crashing when navigating the tree

History

#1 - 2013-05-09 09:01 AM - Bernd Vogelgesang

I can confirm this behavior on Linux Mint from the debian-nightly install.
