Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	16691

Description

Oracle table names can only be 30 characters long. Can you make it so that by default the "Table" column is wide enough on the "Add Oracle Tables" dialog so that the entire table name can be shown by default. Its by far the most important column.
Conversely, SRID is only ever going to be short, but currently defaults to > double what it needs.
