Merging goes without errors, but attributes from the second shapefile are not merged to the first, only geometries are merged.

used to work ok for you on 1.8? If yes please tag this as blocker.

#7707 seems to be about geometries, my question here is about incorrect transfer of attributes.

UPD link for the tests, first one is wrong: <http://gis-lab.info/forum/download/file.php?id=6557>

1.8 works ok with the exception of not handling encoding correctly.
