

QGIS Application - Bug report #7837

the attached points shapefile crashes QGIS when used to created an interpolation raster

2013-05-15 08:36 PM - Mathieu Pellerin - nIRV

Status: Closed	
Priority: High	
Assignee:	
Category: C++ Plugins	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: Yes	Copied to github as #: 16719

Description

It's not a regression as it also crashes 1.8, but would be nice to get fixed as it's a pretty basic GIS expectation for interpolation to work :)

Steps to reproduce:

1. Load the attached hub_utm.shp into a new QGIS project
2. Open the Interpolation Plugin window
3. Add either hub_utm's HubDistInt (int value) or HubDistRea (real value) attribute to interpolation list
4. Enter an output file name
5. Click on OK

QGIS will ungraciously crash at that very moment.

History

#1 - 2013-05-15 08:42 PM - Mathieu Pellerin - nIRV

Note: it crashes with TIN interpolation, but not with IDW interpolation.
