QGIS Application - Bug report #7856

after creating a wms/wcs/wfs/spatialite connection from toolbar, then QGIS browser does not do the refresh

2013-05-18 02:57 AM - Giovanni Manghi

Status:	Closed			
Priority:	Normal			
Assignee:	Hugo Mercier			
Category:	Browser			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16734	

Description

... and the only way is closing and reopening QGIS.

This is a regression because for WMS/WFS/SL it used to work ok in QGIS 1.8.

It works for PostGIS connections also for master.

EDIT:
this happens only when there are no previous connections created, so I guess this is not really a blocker even if it is a (small) regression since 1.8

it seems to work fine at the moment with the latest master.
(or at the least I am seeing the same behavior of 1.8)

Can you confirm it ?

#2 - 2013-07-01 05:06 AM - Giovanni Manghi

- Priority changed from Severe/Regression to Normal

- Subject changed from after creating/deleting a wms/wcs/wfs/spatialite conection from toolbar, then QGIS browser does not do the refresh to after creating a wms/wcs/wfs/spatialite connection from toolbar, then QGIS browser does not do the refresh

just updated to the latest master, **removed all** the wms/wfs/wcs/sl connections, restarted QGIS, and this is what I see:

- WMS:

- I created a WMS connection, the browser (WMS/OWS) is not refreshed

- Closing and reopening QGIS and the browser is refreshed, creating new WMS connections and the browser (WMS/OWS) refresh as expected

- Deleting WMS connections and the browser refresh as expected

Result: the issue is only where there are NO other connections defined

- WFS

- if there are no other wfs connections available then the browser (WFS) is not refreshed, but if there are previous ows connections (from wms or wcs) then the OWS is refreshed

- Closing and reopening QGIS and the browser is refreshed, creating new WFS connections and the browser (WFS/OWS) refresh as expected

- Deleting WFS connections and the browser refresh as expected

Result: the issue is only where there are NO other connections defined

- WCS

Same as above

- SL

Same as above

#3 - 2013-07-15 01:52 AM - Hugo Mercier
- Assignee set to Hugo Mercier

Reproduced. Working on it.

#4 - 2013-07-15 08:19 AM - Hugo Mercier
- Status changed from Open to Resolved
- Resolution set to fixed

Fixed. https://github.com/qgis/Quantum-GIS/pull/737

#5 - 2013-07-16 04:08 PM - Daniel Vaz
