

## QGIS Application - Bug report #7862

### "Already active iterator on this provider was closed." when splitting a postgis polygon

2013-05-19 11:02 AM - Giovanni Manghi

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Vectors	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 16737
<b>Description</b>	
<p>On QGIS master it happens a lot that when splitting a perfectly good geometry the tools silently fails and then in the log it shows</p> <p>Already active iterator on this provider was closed.</p> <p>If the user save edits, re-toggle editing and try the split again the operation usually works.</p> <p>Really not sure if it is a regression, it is for sure a real pain for real world work.</p>

on PostGIS it happens a slot also to get a

postgis. The geometry is invalid. Please repair before trying to split it.

on a good geometry... and in this cases regardless the error message the split is done.
