

QGIS Application - Bug report #7880

WFS-T client on master fails to save edits on a TinyOWS server

2013-05-22 11:37 AM - Giovanni Manghi

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Web Services clients/WFS	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 16754
Description	
It works on 1.8 (using obviously the very same server/layer).

Hi Giovanni,

Could you provide any link for testing ?

Does it generate the same error of #7881 when you try to commit changes ?

Inserting works neither in master nor 1.8 for me.

wait, I may have done something wrong server side.

#7 - 2013-07-14 01:43 AM - Salvatore Larosa

I tested the service on both master and 1.8
and I see the same behavior. no possibility to update, insert or delete the "evora" layer.

What is the format of the layer ? PostGIS, SHP, ??

What is the format of the layer ? PostGIS, SHP, ??

please try again,

I probably hit this issue #6798

while preparing the sample layer for the tinyows server.

#6798

while preparing the sample layer for the tinyows server.

ok, on 1.8 works while on master only insert is not working

#10 - 2013-07-14 02:04 AM - Giovanni Manghi

ok, on 1.8 works while on master only insert is not working

so now is probably the same is as qgis server (with postgis)?

#11 - 2013-07-14 02:37 AM - Giovanni Manghi

ok, on 1.8 works while on master only insert is not working

weird, for is not working also update.

weird, for is not working also update.

my comment was not complete, sorry, update works changing a value in the attribute table but it doesn't after editing some geometries.
