

QGIS Application - Bug report #7914

Diagrams should use Column names instead of Column number

2013-05-27 03:11 AM - Hien TRAN-QUANG

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16786
Description	
<p>In master, I made a layer with diagrams, with fields A,B,C</p> <p>For some reasons, I added some columns in my table I recreated from scratch (via pgscript), with fields A,A1,A2,B,B1,B2,C,C1,C2 The resulting diagrams use A, A1, A2 fields. So it seems that column numbers are used instead of names.</p>

Not sure if it really solves your case. A real solution would require refactoring quite a couple of classes.
