QGIS Application - Bug report #7914
Diagrams should use Column names instead of Column number

2013-05-27 03:11 AM - Hien TRAN-QUANG

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Symbology			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16786	

Description

In master, I made a layer with diagrams, with fields A,B,C

For some reasons, I added some columns in my table I recreated from scratch (via pgscript), with fields A,A1,A2,B,B1,B2,C,C1,C2
The resulting diagrams use A, A1, A2 fields. So it seems that column numbers are used instead of names.

Not sure if it really solves your case. A real solution would require refactoring quite a couple of classes.
