

QGIS Application - Bug report #7915

Pdf export vs centroid fill

2013-05-27 04:35 AM - Alessandro Ciali

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System: Window	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 16787

Description

Tring to export as pdf (both single and atlas) of type vector a map containing a polyon layer symbolized by centroid fill -> Font Marker results in a corrupted pdf. Export ends without errors but opening pdf with acrobat reader an error appears and pdf file is incomplete. No problems with other centroid fill types as simple symbol. Attached the .qml giving problems.

I consider this a blocker, because in previous versions it worked without problems.

Can't confirm here. Works as expected.

#2 - 2013-05-28 11:19 PM - Alessandro Ciali

- Status changed from Open to Closed

I can't reproduce this bug with a new project and the same style. Maybe a problem related to polygons or project...I close this ticket for now, I'll open a new one when things will be more clear.
