<b>Description</b>	
Hi	
I had a issue with my old laptop (running Windows Vista) saving Layer Styles. I had done previously, but then for some reason or other it stopped working. I posed the question on Stack Exchange but got nowhere and as no one else had the problem, I guessed it was something to do with my machine. As I was getting a new laptop I did not go any further. However, I now have a new laptop (running Windows 8) and have exactly the same problem. Any thoughts?	
Regards, Peter

### History

#### #1 - 2013-05-29 05:45 AM - Peter Cornelissen

Hi. I just realised that the issue is when trying to save layer style on layers created from delimited csv files. Is that expected or is that actually an issue? There is no warning given and it even says that you are overwriting an exiting file if you choose to do that.

if I'm not wrong it is a known issue that has already a ticket. Please check and eventually add your notes there. If you are not testing qgis master please do, the bug may be eventually already fixed. Cheers!

Bug still active in January 2014 weekly (v2.1.0-1) x86. Cannot save styles from a csv, gives no error message.
