

QGIS Application - Bug report #795

WMS Connection doesn't reload from saved project

2007-11-07 11:12 PM - horst-duester -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Web Services clients/WMS	
Affected QGIS version:	Regression?: No
Operating System: RedHat	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10854
Description	
When I reload a saved project which contains WMS layer, these layer appear in the table of contents but they are not shown in the mapcanvas.	

History

#1 - 2007-11-08 01:54 PM - Jürgen Fischer

- Status changed from Open to Closed
- Resolution set to fixed

should already be fixed with commit:bc72f778 (SVN r7351)

#2 - 2007-11-08 11:11 PM - horst-duester -

- Resolution deleted (fixed)
- Status changed from Closed to Feedback

For me it doesn't work with rev. 7359. Are there any dependencies to other libs like GDAL? Is a special GDAL rev. assumed?

#3 - 2007-11-09 12:18 AM - Jürgen Fischer

If the WMS layer doesn't show only on reload of the project, but is fine before, I wouldn't expect a dependency problem.

Can you supply a testcase to reproduce the problem?

#4 - 2007-11-09 01:21 AM - horst-duester -

Loading of a rev. 7359 stored project works for me now too. (see test.qgs)
Loadings of a pre rev. 7359 stored project doesn't work. (see wms_project.qgs)

Lets have a look at this behavior. Maybe we can close this ticket.

#5 - 2007-11-09 02:20 AM - Jürgen Fischer

I can load (and see) both in . In the diff between the old and new project file I see that the geographicflag in the SRS of the layer changes from true to

false.

What happens if you change that?

#6 - 2007-11-09 03:52 AM - horst-duester -

- *Resolution set to fixed*

mmm...

The essential difference of the two project files is the `<wmsFormat></wmsFormat>` Tag.

The non working file says `<wmsFormat>image/gif</wmsFormat>` and the working file says `<wmsFormat>image/png</wmsFormat>`. The mentioned WMS doesn't deliver gif images, only png and jpeg. Of course QGIS is not able to load this wms.

The latest rev. 7395 saves the `<wmsFormat>` tag in the correct way. Perhaps there is a bug in former revisions.
