

QGIS Application - Feature request #796

Vertex-level editing

2007-11-08 02:40 PM - John Tull

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Digitising	
Pull Request or Patch supplied:	Resolution: duplicate
Easy fix?: No	Copied to github as #: 10855
Description	
<p>Ability to use editing tools on multiple vertices at a time. For instance, the delete vertex tool would be able to draw a rectangle around a selection of vertices within a polygon, line, or series of points and delete them all at once. Optionally, a selection on a subset of vertices could be made with the selection tool, then the move vertex tool could move the selected set of vertices on click and drag.</p>

Hi John

Isn't this a duplicate of your #748 by any chance?

#2 - 2008-02-22 10:12 AM - John Tull

- Resolution set to duplicate

- Status changed from Open to Closed
