

QGIS Application - Bug report #7993

Fields are listed twice in labelling data defined menu

2013-06-03 03:35 PM - Nyall Dawson

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Labelling	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 16844
Description		
<p>I'm currently seeing all fields listed twice under the new data defined labelling buttons, in the "attribute field" submenu. Seems to be duplicated regardless of the file format - I see this with PostGIS tables and shapefiles.</p> <p>I've attached a screenshot to demonstrate.</p>

Larry - I'm still seeing this behaviour on current master.

#3 - 2013-06-04 02:50 AM - Nyall Dawson

To narrow this down -- I'm only seeing this in the label settings pane which is part of the layer properties dialog. If I open the label settings directly via the toolbar then the fields are only listed once.

#4 - 2013-06-04 03:03 PM - Larry Shaffer

Hi Nyall,

Thanks for the update. I did only test it in the standalone labeling dialog, so did not see the issue was not fixed.

The commit commit:a29f2ba should do it. Please test.

I've cleaned up the code and made sure multiple calls to init() were clearing the field list first (they weren't before).
