

QGIS Application - Bug report #7994

legend spacing broken for layer set to "hidden"

2013-06-03 08:00 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	High	
Assignee:	Radim Blazek	
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:	unspecified	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 16845
Description		
<p>It appears that when a QGIS composer legend's layer is set to hidden, it fails to take into account the previous item offset when rendering legend box. It's a bit hard to explain in words, I believe the attached screenshot does a better at describing the issue.</p> <p>I've also created a dummy project file with a composer that shows the symptoms to facilitate debugging.</p> <p>This appears to be the last remaining issue for QGIS composer legends item placement. Reluctant to set it as blocker, so will leave it as high, but IMO should be fixed prior to 2.0.</p>

- Status changed from Open to Closed

Fixed in changeset commit:"499db4ecc8d91343f16c73da3575ff478303dde3".

#2 - 2013-06-10 05:12 AM - Radim Blazek

I have changed a bit spacing. Instead of using group top margin for space between the title and the first item in column it is now using new "Title space" which is space below title (it is written in tooltip).

It should now work as expected.

#3 - 2013-06-10 09:05 PM - Mathieu Pellerin - nIRV

Radim, great, working like a charm here. Also, glad you introduced the title spacing option, that was needed. Cheers
