

QGIS Application - Feature request #8006

Adjust print composer table columns with long text (or add "wrap on text" option)

2013-06-05 08:57 PM - James Harvey

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Composer/Printing	
Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 16856
Description	
It would be good to adjust the print composer data tables so that long text within a row can wrap.

I cannot see this option on my 1.9 weekly build. I have tried looking under the item properties on the Print Composer and clicking through to sub menus off the table insert option. Is the "wrap on text" a recent addition I am missing and just need to update my QGIS for this?

#3 - 2013-06-07 03:13 AM - Giovanni Manghi

- File 18.png added

The image posted 18.png was for the Legend and not the Table attribute ;-)- I have posted the errors I get. I don't see a wrap on text option, but I would prefer either to set the column width somehow in the settings or click on a column line and drag it out and let the text wrap inside.

I also get column lines showing after I have deleted attributes. I will post this as a new issue.

I am now using Windows 1.9 Weekly Build QGIS bdd61d5

probably already fixed, see #7781

#6 - 2013-07-09 12:27 AM - Giovanni Manghi

- Subject changed from *Adjust print composer table columns with long text* to *Adjust print composer table columns with long text (or add "wrap on text" option)*

- OS version deleted (1.9 Weekly Build QGIS 6164ace)

- Operating System deleted (Windows)

- Target version set to *Future Release* - Nice to have

#7 - 2014-07-20 08:17 PM - Russell Fulton

I'll add a +1 to this. I have site descriptions that I want to print on the second page of the map (back of the sheet). Some of these are quite long and get truncated.
