QGIS Application - Bug report #8053
Customization not available for panels and for dialogs containing qgs widget classes [regression]

2013-06-13 04:38 AM - Borys Jurgiel

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Customisation Framework			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	duplicate	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16894	

Description

1. The widgets_tree.py rejects dialogs containing qgs widget classes, thus they are not included to the custiomization.xml:

No module named qgscollapsiblegroupbox

No module named qgsfilterlineedit

No module named qgsexpressionbuilderwidget

No module named qgsrasterformatsaveoptionswidget

No module named qgsdualview

No module named attributetable.qgsattributetableview

It was working fine in QGIS 1.8.

2. Panels/docks are visible in the customization dialog, however unchecking them takes no effect. It was working fine in QGIS 1.8 too. Note they are now shown as "Panels". In QGIS they were "Docks".
