|---|-------------------------------------|
| Status: Closed | |
| Priority: Severe/Regression | |
| Assignee: | |
| Category: Customisation Framework | |
| Affected QGIS version: master | Regression?: No |
| Operating System: | Easy fix?: No |
| Pull Request or Patch supplied: No | Resolution: fixed |
| Crashes QGIS or corrupts data: No | Copied to github as #: 16895 |
| Description | |
| <p>1. The widgets_tree.py rejects dialogs containing qgs widget classes, thus they are not included to the customization.xml: No module named qgscollapsiblegroupbox No module named qgsfilterlineedit No module named qgsexpressionbuilderwidget No module named qgsrasterformatsaveoptionswidget No module named qgsdualview No module named attributetable.qgsattributetableview</p> <p>It was working fine in QGIS 1.8.</p> <p>2. Panels/docks are visible in the customization dialog, however unchecking them takes no effect. It was working fine in QGIS 1.8 too. Note they are now shown as "Panels". In QGIS they were "Docks".</p> | |
