

QGIS Application - Feature request #8113

buildvrt: list of files as a file, not as a list

2013-06-19 03:01 AM - Paolo Cavallini

Status: Closed	
Priority: Low	
Assignee:	
Category: Processing/GDAL	
Pull Request or Patch Supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 16947
Description	
Currently, ``buildvrt`` adds layers as a list of arguments; this can cause problems in case of a very long list. Better save the list in a file, and pass this to the command	

History

#1 - 2013-06-19 03:49 AM - Regis Haubourg

+1, you can raise a bit priority for this

#2 - 2017-01-02 05:55 AM - Giovanni Manghi

- Category changed from GDAL Tools to Processing/GDAL

#3 - 2017-05-01 12:48 AM - Giovanni Manghi

- Easy fix? set to No

#4 - 2017-08-15 01:30 PM - Nyal Dawson

- Status changed from Open to Feedback

This is fixed in processing version, isn't it?

#5 - 2017-08-15 11:36 PM - Giovanni Manghi

- Status changed from Feedback to Open

no, I don't think so. Another issue in processing, compared "GDAL Tools"/"ftools", is that if I want to merge rasters/vectors or create a virtual rasters then the input layers must be loaded in the project, while gdal tools/ftools allowed to use a folder as input.

#6 - 2017-08-16 06:00 AM - Nyal Dawson

I'm 99% sure this is fixed - see <https://github.com/ggjs/QGIS/blob/master/python/plugins/processing/algs/gdal/buildvrt.py#L91>

Regarding the non project layers, that's fixed in commit:5d4d12d371be72b66ae7e307ea84d5c153565dfd , part of

<https://github.com/qgis/QGIS/pull/5024>. Is there a separate issue for that one?

#7 - 2017-08-18 03:23 PM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Open to Closed

all good. I was almost sure there was a ticket about the non project layers but can't find it.
