QGIS Application - Bug report #815
Delimited text layer provider broken

2007-11-18 12:21 AM - perrygeo -

Status:	Closed			
Priority:	Low			
Assignee:	Gavin Macaulay -			
Category:	Data Provider			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10874	

Description

A recent update (r 7449) caused the delimited text layer provider to go haywire.

The following text file used to work fine ~ 2 weeks prior:

    place|lon|lat
    Boston, MA, US|-71.056699|42.358635
    New York, NY, US|-74.007124|40.71455
    Los Angeles, CA, US|-118.245009|34.05329

now adding it via the python bindings or the plugin yields the error "The layer is not valid and cannot be added to the map"
