

QGIS Application - Bug report #8181

groupLayerRelationship method broken in Python

2013-06-27 05:43 AM - Bernhard Ströbl

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Python plugins	
Affected QGIS version: master	Regression?: No
Operating System: Linux	Easy fix?: No
Pull Request or Patch Applied: No	Resolution:
Crashes QGIS or corrupts data: Yes	Copied to github as #: 17000
Description	
QGIS master (28efcda) crashes when using <code>iface.legendInterface().groupLayerRelationship()</code> in a project with at least one vector layer loaded no matter if issued on the Python console or in a plugin

- Status changed from Open to Closed

Hi, try to update your revision, that should be fixed in commit:1f10010

I am closing as it is a duplicate of #8061

Please reopen if it doesn't work for you !

Sorry for the noise, I was under the impression of running current master but instead I was running an older version.

Yes it definitely works now!
