

QGIS Application - Bug report #8200

The plugin toolbar is empty

2013-07-01 12:23 AM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	No	Copied to github as #: 17018
Description		
In the the latest master revisions the plugins toolbar is completely empty. The plugins that is supposed to show in the toolbar are available trough the menus or the right click.		

History

#1 - 2013-07-09 03:18 PM - Daniel Vaz

The issue #4069 says that plugins should be categorized in appropriated menu. I don't know if that behaviour may be considered as a feature of version 2.0.0 or a bug.

#2 - 2013-07-09 11:07 PM - Nathan Woodrow

- Resolution set to worksforme
- Status changed from Open to Closed

This works fine for me running the latest master. Not all plugins add themselves to this toolbar so it's up to each user.

for a few days the plugin bar was always empty, even with plugins active/installed that were supposed to show there. Probably somehow fixed in the meanwhile?
