Status: Closed	
Priority: Severe/Regression	
Assignee: Jürgen Fischer	
Category: Digitising	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 17069
Description	
<p>With the latest master commit:42d57d6 if you move a node shared by two polygons (with the option topological editing) and undo the action, only one vertex is moved back to its original position, the other remain in the position where it is moved; no more undo is available. I will do further tests on digitising actions</p>
