#### Description

I am using version QGis 1.8 Lisboa, under Ubuntu 12.04.

When I try to save a shapefile as spatialite (right click on layer or via Layer menu), the float fields are truncated.

See data attached.

#### History

#1 - 2013-07-24 04:53 PM - Daniel Vaz

- Status changed from Open to Closed

It just affects 1.8.0 that hasn't backports. Closing this issue.
