

QGIS Application - Bug report #8286

save edits becomes slower until QGIS crashes

2013-07-12 02:47 PM - Alessandro Ciali

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>	Digitising	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 17086
<b>Description</b>		
save edits commands in editing session becomes slower after about 10-15 "save edits" commands. 3 save more and QGIS Crash. Same effect with start/stop editing. It seems not related to any definite action or command. I have tagged as blocker because I haven't noticed this bug on 1.8

I cannot replicate the issue, can you attach a sample project and specify the exact steps to replicate and the project/snapping properties as well?

My fault probably a problem created by the plugin "digitizing tool". After disinstalling, always get better.  
I'll close the ticket my apologies
