Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	17095

Description

I swear I successfully imported a large CSV file into a spatialite database via DB Manager recently. It's not working anymore.

Steps to reproduce:

1. Open DB manager

2. Open a spatialite database

3. Click on the Import layer/file toolbar button

4. Open the file selector and pick the attached dbmanager_test_import.csv

5. Click on the Update options button

6. Click on OK

The import process will fail with this error message: "Error 8 Loading of layer failed"
