

QGIS Application - Bug report #8305

Help viewer process running in the background with no help viewer (or even QGIS) open

2013-07-15 10:09 PM - Alister Hood

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 17099
Description		
<p>Problem 1: If I right-click on a vector layer, click "Save as", and click help, qgis_help.exe starts in the background, but no help window is displayed.</p> <p>Problem 2: If I click help again, then the help viewer is displayed. If I then close the help viewer, the qgis_help.exe process ends. But if I leave the help viewer open and close QGIS instead, the help viewer also closes (this might be OK, although I think it would be better if it stayed open), but the qgis_help.exe process does not end.</p> <p>This is on Windows XP</p>

Revision a43a287a - 2016-02-25 04:21 PM - Jürgen Fischer

don't close qgis_help when qgis closes (fixes #8305)

History

#1 - 2016-02-25 07:22 AM - Jürgen Fischer

- Status changed from Open to Closed

Fixed in changeset commit:"a43a287a7929ce8505e9a694a6ac685a45dc6854".

Problem 1 wasn't reproducible. worksfor me.

Problem 2 was fixed by not terminating the help process - ie. leaving the window open, when QGIS terminates.
