

QGIS Application - Bug report #8329

Changed symbol size not shown properly in Vector Properties dialog

2013-07-20 03:46 AM - Sake Wagenaar

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 17119
Description	
<p>If I return to the Vector Properties dialog, after changing the size of a point symbol and clicking 'OK', the symbol size is put back to 1.00. This problem occurs with 'single symbol', 'categorized' and 'graduated' styles. I used QGIS 1.9.0-Master (00de1f9).</p>

- Resolution set to invalid
- Status changed from Open to Closed

you must click on "simple marker" to see the correct size.

When you have marker selected, the shown size is referring to an eventual additional marker you want to add, or to change the size of all the markers at the same time.
